Anamika Raj

Data Engineer | Full-Stack Developer | AI/ML Engineer

anamikarajwork@gmail.com 82078 10431 Chennai, India Github LinkedIn

SUMMARY

Data Engineer skilled in Python, SQL, ETL pipelines, data modelling, and large-scale data processing using Pandas, NumPy, and Scikit-learn. Experienced in building automated workflows, production-ready APIs, and scalable applications with Flask, React.js, MySQL, and Amazon S3. Strong in system design, debugging, performance optimisation, and integrating ML-driven insights into end-to-end solutions.

EXPERIENCE

Data Analytics Job Simulation, *Deloitte Australia | 07/2025 – 07/2025 | Remote*

- Analyzed datasets of 10,000+ records across forensic and business scenarios, identifying trends and supporting data-driven evaluations.
- Built an interactive Tableau dashboard that streamlined reporting and enabled stakeholders to uncover key insights more efficiently.
- Utilised Excel for data cleaning, classification, and analysis, contributing to actionable business recommendations.

Cloud Intern, *Eduskills | 04/2025 – 06/2025 | Remote*

- Deployed cloud-native applications on AWS EC2 and S3, enhancing system scalability and reliability for 50+ active users.
- Optimized cloud architecture and IAM configurations, reducing potential security risks by 30%.
- Completed a 10-week project-based internship focused on real-world cloud deployment workflows, consistently meeting all deadlines and deliverables.

EDUCATION

Bachelor of Technology in Computer Science with specialization in Big Data Analytics, *SRM Institute of Science and Technology* 07/2023 – 05/2027
GPA: 9.76

Higher Secondary School, *Banasthali Vidyapeeth* 07/2021 – 05/2022
GPA: 9.33

SKILLS

Technical Skills
Flask, React.js, Git, VS Code, Jupyter Notebook, Tableau, AWS, GCP, MySQL, Firebase, Oracle, Supabase, Pandas, NumPy, Scikit-learn, Gemini, Vertex AI, Python, JavaScript, Java, C++, SQL, HTML, CSS, ETL, Data Pipelines, Snowflake

Soft Skills
Leadership, Problem-Solving, Communication, Teamwork, Time Management

AWARDS & HONORS

Best Team Award, *Altruisty in collaboration with SRMIST* 01/12/2024
HACKPICK Hackathon 2025

PROJECTS

CloudShelf
Developed a cloud-based e-library featuring categorized book storage (PDF), user dashboard, login/authentication, and real-time wishlist. Integrated cloud storage with AWS S3 and built an intuitive frontend for smooth user experience.
Technologies: Flask, React, Supabase, Amazon S3

CareerCraft
Built a career guidance platform enabling students to explore certifications, skill paths, and career opportunities. Designed a modular Flask backend with clean routing and scalable architecture for seamless navigation.
Technologies: Flask, React, Supabase

CERTIFICATIONS

- AWS Cloud Architect: AWS Academy
- Prompt Design in Vertex AI: Google
- Gemini Imagen AI Applications: Google
- DBMS: Scaler
