Rahul Arakeri

Aspiring Data Engineer

rahularakeri069@gmail.com — +91-7022719217 — linkedin.com/in/rahularakeri010 — github.com/rahulrarakeri

Summary

Aspiring Data Engineer proficient in Python, SQL, ETL, databases, data validation, and automation. Hands-on with MySQL, Pandas, and schema design. Familiar with data warehousing concepts, joins, CTEs, and performance tuning.

Education

SRM Institute of Science and Technology (SRMIST) Chennai, India
B.Tech in Computer Science Engineering (3rd Year) *2023 – 2027*
– CGPA: 8.62 / 10

Narayana Junior College Telangana, India
Higher Secondary Education (Class XII) *2022*
– Percentage: 84.5

Technical Skills

Languages: Python, SQL, Java (Basic), C, C++, JavaScript, HTML, CSS
Core Concepts: DBMS, OOPS, Capstone Project
Data Engineering: ETL, Data Cleaning, Data Modeling, Data Warehousing, Docker (Basics)
Tools/Tech: Pandas, NumPy, Git/GitHub, Linux, Excel, Scikit-learn, REST API, JSON
Databases: MySQL, PostgreSQL, MongoDB
Cloud: AWS (S3, EC2 - Basics) / GCP (Basics)

Projects

Cricket Score Predictor (Python, Machine Learning) 2025
– **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib
– Developed a machine learning model to predict cricket match scores using historical ball-by-ball and match datasets.
– Performed data preprocessing, feature engineering, and handled missing values to improve dataset quality.
– Trained and evaluated regression models using metrics such as MAE/RMSE to improve prediction accuracy.

Customer Churn Prediction (ML, Data Analytics) 2025
– **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Seaborn/Matplotlib
– Built a churn prediction system to identify customers likely to leave using structured business datasets.
– Applied data cleaning, encoding, scaling, and class balancing techniques to improve model reliability.
– Trained classification models and analyzed feature importance to support retention-focused decision making.

Smart Library Management System (DBMS, OOPS) 2024
– **Tech Stack:** Java, OOPS, MySQL, SQL, DBMS
– Developed a library management system to manage books, members, issuing/return records, and fine calculation.
– Implemented DBMS concepts including CRUD operations, relational schema design, and optimized SQL queries.
– Integrated authentication, search functionality, and reporting modules for better library tracking and monitoring.

Experience

Cloud Virtual Intern Apr 2025 – Jun 2025
EduSkills & AWS Academy *Remote*
– Launched 3 cloud-native applications on AWS EC2 and S3, improving system scalability and reliability for 50+ active users with 99.5% uptime.
– Configured cloud architecture and IAM policies, reducing potential security vulnerabilities by 30% through least-privilege access controls.
– Delivered a 10-week project-based internship completing 8 cloud deployment modules on real-world DevOps workflows.

Certifications

– Programming in C & C++
– Machine Learning - NPTEL
– Cisco - Computer Networks

Achievements

– Secured **Rank 1** in **Mini MCM Inter-College Hackathon** for developing an impactful data-driven solution.
– Received **college sponsorship** to represent SRMIST in the **MCM Global Hackathon** based on hackathon performance.
– MCM Global Hackathon results **awaited** (participation completed).
